DETAILED ACTION

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
2. Claims 1-32 are presented for examination.
3. Claims 1-32 are allowed.
4. The following is an examiner's statement of reasons for allowance:
The prior art on record does not teach "in response to a handle request, indicating the name of a required data field, from a component of the system, accessing the format information to determine the location of the required data field in a said message, and supplying a handle, indicative of said location, to said component; and in response to subsequent parsing requests, each comprising the handle and said message, from said component, extracting the required data field from the message in each parsing request according to the location indicated by the handle", as recited in claim 1, and similarly in independent claims 11, 21, 22 and 30. In other words, the closest prior art on record (such as U. S. Patent 6,668,284 to Parkhurst) does not teach decoupling the handle operation and the subsequent parsing operation such that a handle indicating the location of a required data field in a message being parsed is returned to the requesting component and is later included in the component's subsequent parsing request(s). Applicants' invention would reduce message parsing overhead by re-using the returned handle.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
